

WE HELP SAVE LIVES BY CONNECTING DONORS  
AND PATIENTS THROUGH THE GIFT OF BLOOD.

One of LifeStream's core beliefs is that everyone deserves to be treated with compassion, dignity, and respect. We understand that a male-female "gender" designation is uncomfortable for some donors, especially those who now identify as a different gender than their sex assigned at birth. We respectfully ask that donors select their birth-assigned sex for purpose of blood donation.

There are gender-specific requirements in place for donor safety, including hemoglobin levels.

Thank you for your understanding.
